

All People's Nuclear Policy Contacts are listed alphabetically.

Abalone Alliance Safe Energy Clearinghouse,

Don Eichelberger, www.energy-net.org
2940 16th St., #310, San Francisco 94103 ph. 415-861-0592, fax 558-8135, done@greens.org

Reactor(s), dumpsite or transportation route:
Yucca Mt., any reincarnation of Ward Valley.

Group/community's goals:
Pretty united in opposing all things that will help further development of nuclear anything.

Activities:
Issue electronic newsletter, Rad Bull, with articles and documents on all manner of nuclear news, web site (see above), local outreach and education through events, active politically with the Green Party of CA, I am co-chair of the State Issues Working Group and Chair the Energy Working Group, helping write energy platform and seeking political action ie public power and funding for renewables and conservation, stop subsidies for nuclear.

Most pressing need to meet your goals: A profound shift in people's awareness of the issue, and the effects of unbridled consumerism that fuels need for unsustainable growth that can come only from massive energy infrastructure, including nuclear.

Bay Area Nuclear Waste Coalition

Co-Directors Philip M. Klasky and Ward A. Young
2760 Golden Gate Avenue, San Francisco, California 94118
Phil (415) 752-8678 pklasky@igc.org
Ward (415) 868-2146 wyoung7777@aol.com
Ernie Goiten, Boardmember fego@pacbell.net

Reactor(s), dumpsite or transportation route:
All LLRW generators in California with an emphasis on nuclear utilities.

Group/community's goals:
Obtain broad-based and overwhelming support for the LLRW Inventory legislation that will require, for the first time, all of California's low-level radioactive waste generators (including utilities and the military) to report on an annual basis how much and what kinds of waste they produce and the disposition of the waste (shipped off-site, stored on-site, etc.). The inventory will help create an accurate picture of the components of the waste stream and what is done with the waste in order to develop an informed state policy on LLRW management. It will also discourage the nuclear industry's propensity to mischaracterize the waste stream like they did when advocating for the proposed (and defeated) Ward Valley nuclear waste dump. This is an issue of the public's right to know and environmental justice.

Activities:
Technical review, community organizing, education and outreach, legislation, legal action, direct action, participation in decision-making processes.

California Green Party

Larry Shoup, Candidate for CA Secretary of State
609 Aileen Street, Oakland CA 94609
(510) 654-7394 larryshoup@earthlink.net
www.voteshoup.org www.cagreens.org

Reactor(s), dumpsite or transportation route:
All nuclear generation sites.

Group/community's goals:
Large-scale use of decentralized solar power, to begin replacing the pollution, concentration and centralization of power characteristic of nuclear and petroleum-based energy production systems.

Activities:
Political campaigns, direct action, educational work.

Citizen Alert

John Hadder
P.O. Box 5339, Reno, NV 89513
775-827-4200 (fax) 775-827-4299
hadder@citizenalert.org www.citizenalert.org

Reactor(s), dumpsite or transportation route:

Yucca Mountain and relevant transportation in Nevada, as well as additional cumulative impacts of Nevada Test Site.

Group/community's goals:

Sound science makes it clear that Yucca Mountain cannot safely contain the nation's high-level waste. Nevadans have said so again and again. Citizen Alert is a voice for the land and people of Nevada.

Activities:

Newsletter and email Action Alert, technical review, community organizing, legal action, direct action, participation in DOE and other public hearings, coalition work with other groups.

Citizens Awareness Network

Rosemary Bassilakis & Sal Mangiagli
54 Old Turnpike Road, Haddam, CT 06438
Ph/fax 860 345-2157 ctcan@snet.net
www.nukebusters.org

Reactor(s), dumpsite or transportation route:

Making New England nuclear-free.

Citizens Opposition to Rocket Pollution (CORP), VAFB Project

Sheila Baker
pedal4mother@yahoo.com

Reactor(s), dumpsite or transportation route:

Diablo Canyon Nuclear Plant; Ocean Barge Route; Diablo is 50 miles north of Vandenberg AFB and the barge proposal is in line with rocket launches in the ocean.

Activities:

I protest, use email, speakers, and stay close to the media. Nora Wallace of Santa Barbara Newspress has published an article on CORP and the deuterium fluoride laser program.

Deep Ecology Center

Linda Seeley
San Luis Obispo CA (805) 544-8112
lseeley@pacbell.com

Reactor(s), dumpsite or transportation route:

Diablo Canyon Nuclear Power Plant

Group/community's goals:

Our group's goal, based on the Nuclear Guardianship Project, is to spread awareness about the long-term responsibility for guarding the site of nuclear waste for countless generations into the future.

Activities:

We will help people learn the story of nuclear poisons, and we will develop an oral history to pass on to future generations who will live in the shadow of the plant. By doing this, we hope to motivate the present generation to realize that the plant must be shut down now.

GreenAction

Bradley Angel, Director
One Hallidie Plaza, Suite 760, San Francisco CA 94044
(415) 248-5010 Fax (415) 248-5011
bradley@greenaction.org www.greenaction.org

Green Party of Utah

Bob Brister, 1102 South 800 East #A, Salt Lake City UT 84105 (801) 363-0898 bbrister@greens.org

Yucca Mt. and current shipments of LLW and transuranic waste.

Russell D. Hoffman, San Onofre Reactor

Independent Investigator

P. O. Box 1936, Carlsbad, CA, 92018

(760) 720-7261 rhoffman@animatedsoftware.com

<http://www.animatedsoftware.com/enviro/m/onofre/index.htm>

Reactor(s), dumpsite or transportation route:

All of them!

Group/community's goals:

Shut down every nuke, dismantle every weapon, protect every waste dump from terrorists, and don't pretend any of that crap is recyclable because it isn't.

Activities:

I attempt to engage government employees in direct email letter-writing campaigns to present the facts to them so that they can no longer deny them. Also, I am trying to build a useful web site, to send out unsolicited testimonials to persons and media whom I have prior reason to believe may be interested, and generally, I try to raise the public's awareness, by such things as chastising the press whenever necessary (which is almost constantly), informing them (the press) of the facts as much as possible, and present to people, additional resources where factual information can be located. I have a personal collection of over 200 nuclear-related books, a lot of knowledgeable and helpful contacts, and a fast Internet connection to do my research. It helps to be a fast typist and married to a professional editor who is behind you 100%, two benefits I have.

HOME: Healing Ourselves & Mother Earth

Jennifer Olaranna Viereck, Director

PO Box 420, Tecopa CA 92389

(760) 852-4151

heal@h-o-m-e.org www.h-o-m-e.org

Reactor(s), dumpsite or transportation route:

We are in the direct watershed of Yucca Mountain and parts of the Nevada Test Site, 50 miles downstream. Also on the transportation route for

Group/community's goals:

- Break the silence of nuclear denial, stop making messes we can't clean up, and promote responsible stewardship of wastes;
- Insist on cumulative view of radiation exposure, with full public disclosure and public healthcare;
- Promote democratic nuclear policy making, upholding all treaties, environmental justice, common sense, and sound science;
- Educate the public and policy makers on potential Yucca Mountain impacts on CA.

Activities:

Share information through letter-writing, website, the media, spoken or written comments at DOE hearings, public dialogue (like this forum). Do tours with our 'Museum to End the Nuclear Age' RV, a mobile teaching center.

Institute for Energy & Environmental Research (IEER)

New Mexico Toxics Coalition (NMTTC)

Coila Ash, Executive Director

325 E. Coronado Road #2, Santa Fe, NM 87505

505-982-2609

coilaash@mindspring.com

Reactor(s), dumpsite or transportation route:

Waste sites at Los Alamos National Laboratory in Northern New Mexico, the Waste Isolation Pilot Plant (WIPP) near Carlsbad, New Mexico and the transportation routes within New Mexico.

Group/community's goals:

Our Waste Program supports safe transportation, handling and storage of nuclear, hazardous and

municipal waste. This program also advocates strict safeguards for workers and emergency personnel involved with waste management activities. Our goal is to build a strong statewide citizen's coalition that will join in solidarity with national and international organizations working collectively to protect the environment and population from further destruction and to reclaim public participation in the decision making process.

Activities:

NMTC uses a combination of research, technical assistance, community involvement (educational meetings, tabling etc) and nonviolent direct action.

North American Water Office

George Crocker, Executive Director
PO Box 174, Lake Elmo MN 55042
(651) 770-3861 fax (651) 770-3976

Reactor(s), dumpsite or transportation route:
Prairie Island Nuclear Reactor

Nuclear Age Peace Foundation

Carah Lynn Ong, Director of Research and Publications
PMB 121, 1187 Coast Village Road, Suite 1
Santa Barbara, California 93108-2794 USA
Tel: 805-965-3443 Fax: 805-568-0466
Email: research@napf.org
[Http://www.wagingpeace.org](http://www.wagingpeace.org)
[Http://www.nuclearfiles.org](http://www.nuclearfiles.org)
<http://www.mbmd.org>
[Http://www.abolition2000.org](http://www.abolition2000.org)

Reactor(s), dumpsite or transportation route:
Yucca Mountain, Diablo Canyon, Channel Islands
Waste Transportation route

Group/community's goals:

- Halting the development of the long-term national waste storage site at Yucca Mountain.
- Halting the use of nuclear energy.

- Promoting on-site storage of nuclear waste until a scientifically credible means of disposal is found.
- Promoting renewable energy sources as the only safe, sustainable, environmentally-friendly, and economic energy source alternatives to coal, fossil fuel and nuclear energy.

Activities:

The Nuclear Age Peace Foundation has a Renewable Energy Project whose purpose is to help accelerate the country's ongoing transition to safe, clean, renewable energy sources, by educating the public, government, business, and community leaders to the urgent need for this vital change. We must counter the widespread misconception that the Earth's natural resources are infinite and that we can continue to use any energy sources-even those that are very harmful to our environment.

The Nuclear Age Peace Foundation also provides research and information to people around the world on nuclear energy and waste matters in the form of our monthly electronic newsletter, The Sunflower.

Nuclear Information and Resource Service

Kevin Kamps, Nuclear Waste Specialist
1424 16th Street, NW, Suite 404
Washington, D.C. 20036
202.328.0002 fax 202.462.2183
kevin@nirs.org www.nirs.org

Reactor(s), dumpsite or transportation route:

Proposed Private Fuel Storage dump targeted at the Skull Valley Goshute Indian Reservation in Utah; proposed Yucca Mountain dump targeted at Western Shoshone land in Nevada; the truck and train routes through 45 States that would be used to haul high-level atomic waste to these proposed Western dumps. Also, storage of high-level waste at commercial reactor sites, whether in storage pools or dry storage casks.

Group/community's goals:

An ounce of prevention is worth a pound of cure. The generation of high-level nuclear waste must be stopped as soon as possible, or the problem will double, triple, or quadruple in size from what we

are facing now. NIRS position is that nuclear waste must be isolated from the biosphere for as long as it remains hazardous—hundreds of thousands and millions of years. Nuclear waste is dangerous no matter where it is, whether sitting still in storage pools or dry casks, traveling 60 miles per hour on the roads or rails, or at proposed “interim storage” or permanent burial sites.

As Yucca Mountain, NV and Skull Valley, UT are scientifically unsuitable and environmentally racist sites, they are unacceptable. Thus, launching thousands and tens of thousands of atomic waste trucks and trains, with all the risk that goes with that, to dump waste in active earthquake zones is unacceptable. Waste will have to be moved someday, because it is currently located on rivers, lakes and seacoasts. But transport should only be undertaken to make the situation better, not worse. Once nuclear power has been phased out and waste generation halted, NIRS would be very interested—along with grassroots concerned citizens at all affected locations—to sit down with government regulators and industry representatives to confront the vexing nuclear waste dilemma, to determine the best way to isolate the deadly radiation from the living environment forevermore.

Activities:

NIRS serves as an information clearing house and watchdog on the industry and the federal government when it comes to nuclear power issues. NIRS has, along with Public Citizen's Critical Mass Energy and Environment Program, conducted "Radioactive Roads and Rails" campaign tours, educating the public in critical States along the transport routes to Yucca Mountain. NIRS is active in grassroots organizing and strategizing both in the US and internationally.

The Nuclear Resister- "a chronicle of hope"

Jack & Felice Cohen-Joppa, editors
P.O. Box 43383, Tucson AZ 85733
phone/fax (520)323-8697 nukeresister@igc.org

Reactor(s), dumpsite or transportation route:

Yucca Mountain - possible southern transport route thru Tucson - I-10 and SP rail.

Group/community's goals:

Since these are unlikely corridors, there is not much local concern - but local support on AZ policy-makers could be garnered for folks in Flagstaff who face more likely shipments along I-40.

Activities:

Encourage and support civil disobedience; publish the Nuclear Resister, network NVDA groups.

Most pressing need to meet your goals?

National PSA/PR support to coordinate local opposition with unified slogans, graphics, press packets, etc. when push comes to shove on interstate transport.

Nuclear Waste Task Force

Judy Treichel, Executive Director
4550 W. Oakey Blvd., Suite 111,
Las Vegas, NV 89102
702-248-1127 judynwtf@aol.com
www.nvantinuclear.org

Ohngo Gaudadeh Devia Awareness

Margene Bullcreek
PO Box 155, Tooele, UT 84074
(435) 831-4361 mbullcreek@yahoo.com

Reactor(s), dumpsite or transportation route:

Proposed PFS Monitored Retrievable Storage Facility on Skull Valley Goshute Reservation.

Group/community's goals:

Prevent 40,000 tons of HLW from being stored on reservation lands, and the destruction of culture and sacred land that would cause.

Activities:

Generating tribal opposition, filing positions on Environmental Justice with DOE, NRC, outreach to tribes and organizations for support, hosting gathering on land (Oct 2001).

Public Citizen

Lisa Gue, Critical Mass Energy Project
1600 20th St. NW, Washington, DC. 20009
(202) 588-1000 LISA_GUE@citizen.org
<http://www.citizen.org/cmep/>

Redwood Alliance & REEI

Michael Welch, office coordinator
PO Box 293, Arcata, CA 95518
707-822-7884 707-822-3481 fax
mwelch@redwoodalliance.org
www.redwoodalliance.org

Facility, dumpsite or transportation route?

Humboldt Bay Nuclear Power Plant decommissioning. Transportation route- very scary Hwy 299 East to Redding.

Group/community's goal?

Getting the job done as soon as possible. We are moving toward onsite dry cask storage as the answer to our special, local problems (serious earthquake will happen) without sticking our spent fuel in some other community.

At this point, the only divisive issues are how long it will take. The transportation route is secondary to that for us, though it is something we talk about.

Activities of your group/community?

Not much these days, mostly renewable energy promotion. The utility has promised to do what we want with the plant.

Most pressing need to help meet your goals?

We need a more active group of folks working with us.

SLO County Grandmothers for Peace

Molly Johnson
6290 Hawk Ridge Place, San Miguel, CA 93451
(805) 467-2431 peacegrannie@hotmail.com

John Stevens
4097 Pershing, San Bernardino CA 92407
(909) 882-2060 johnstevensk9@webtv.net

San Luis Obispo (SLO) Green Party

Klaus Schumann, 26 Hillcrest Drive
Paso Robles, Ca. 93446
Ph. + Fax: (805) 238-4454 jayklaus@msn.com
California Green Party: www.cagreens.org
SLO Green Party: www.slogreens.org

Reactor(s), dumpsite or transportation route:

Diablo Canyon Nuclear Power Plant

Group/community's goals:

- Shut the plant down a.s.a.p.
- Hardening vulnerable plant components (reactor domes, spent fuel pools + cooling components, control room, proposed Independent Spent Fuel Storage Installation) to become impenetrable to sabotage/ terrorists attacks during phase out and as long as storage takes place.

Activities:

Formed a GREEN Party subcommittee on HLNW at Diablo; formed an independent public County committee in 1996 to educate general population and local governments about storage/transportation (SLO Nuclear Waste Management Committee); supply local governments with info about ISFSI's; public info meetings, flyers, radio talk-shows, letters/op-ed pieces/press releases to local press etc..

SLO Mothers For Peace

P.O. Box 164, Pismo Beach CA 93448
<http://www.mothersforpeace.org/>

Reactor(s), dumpsite or transportation route:

Diablo Canyon Nuclear Power Plant

Group/community's goals:

Create legislation that would close Diablo Canyon Nuclear Power Plant when high-level waste storage in the spent fuel pools reaches current capacity (2006). By limiting radioactive waste allowed at Diablo Canyon, our community can lessen the mounting risks of radioactive releases due to accident earthquakes, or terrorism.

Activities:

Legislation was passed in Minnesota, and it can be accomplished here as well!

Shundahai Network

Susi Snyder, PO Box 1115, Salt Lake City, UT
84110 801-359-2614
susi@shundahai.org www.shundahai.org

Reactor(s), dumpsite or transportation route:

We are equally concerned with the Yucca Mountain project and the Private Fuel Storage proposal for the Skull Valley Goshute Reservation.

Group/community's goals:

To stop the PFS project by facilitating a resolution passed by the Skull Valley tribe opposing the dump. To stop the Yucca Mountain project by a congressional veto- or by raising the Environmental Justice concerns & contentions as the project continues. We are also preparing for nonviolent resistance to these proposals, which can take many forms.

Activities:

Shundahai Network organizes bi-annual gatherings. This year we will be at the Nevada Test Site May 11-14, and October 11-14th. We also utilize the tactics of nonviolent direct action, public participation in hearings/ meetings. We hold informational meetings and trainings on a regular basis in our community, as well as on speaking tours throughout the U.S.
